plyfold + smartrail®

every wall should have one

We've all been there. To celebrate a new baby or spend more time with a recovering loved one, friends and family will always be an essential part of an extended hospital stay. Patient rooms aren't getting any larger.

When extra guest seating is needed, the plyfold folding chair is the slim, flexible answer. Mounting to a patient room wall, the smartrail hanger system keeps those extra chairs tucked out of sight – eliminating clutter, making cleaning easier, and avoiding a stubbed toe during night nurse calls.

The plyfold + smartrail® system offers a convenient solution for those important life events that require the love and support of friends and family.

does your wall have one?
