

WIELAND

Thermoform Finishes

Simulating the natural variations in the color and grain with a printing process will not produce an exact match to the finished product. This card is to be used as an indicator of color and grain. We recommend **any final selection be made after viewing physical samples** (color or material chips) in the lighting and environment in which the products will be used.

Wieland reviews and approves all color samples for accuracy under cool white fluorescent light. If you have questions about any aspect of our finish process, please ask your sales representative for more information.

brushed aluminum

hardrock maple

honey alder

solara oak

shaker cherry

clove

palos mahogany

iona gray

finesse

verismo

monterey

beige

pepperdust

chocolate

dark grey

calcutta black

1. Metal finish is natural aluminum and is a warmer tone than silver.
2. See Materials and Finishes section of the price book for additional specialty powder coat colors.
