

### nurse health & patient safety

Partnering with patients, clinicians and designers, the accord<sup>™</sup> recliner addresses caregiver health, patient safety and design flexibility. Wieland's innovation is apparent in multiple new-to-the-world features.

#### safeBrake

Brake pads drop down and grip the floor securely, delivering exceptional stability. An industry first, only Wieland separates the casters and brakes. Accord's dedicated brake system outperforms brake systems that are combined with the casters.

- makes a solid stop on uneven floors
- greater surface area increases staying power
- brake retracts completely when not in use
- brake pads stay clean

#### intelliTrac™

Magnetic casters auto-align and auto-release offering the control to change direction quickly from straight to sideways.

- track straight or move perpendicular with a nudge
- designed to work with the safeBrake system, casters will not rotate or roll when brake is engaged
- available in black or grey

sideways

straight

#### quick release seat

Provides easy access for cleaning and infection control.

#### transfer arm

A front-released arm that pivots towards the back of the chair for an obstacle-free, hands-free patient transfer.

Centrally located foot pedals that are conveniently accessed from the front—no bending, stooping or reaching required.

## highlights

- promotes health and safety to both patient and caregiver
- safeBrake provides exceptional stability by gripping the floor rather than merely stopping the casters
- the intelliTrac<sup>™</sup> caster system helps guide the chair straight down a corridor to minimize strain
- quick-release seat option supports infection prevention and safety efforts
- · centrally located foot pedals give access to all controls from the front of the chair
- patient transfers are made easier with the shortest transfer distance between the bed and the chair
- wide, flat arm caps and healthful geometries all provide a higher level of patient comfort
- aesthetically considerate of any architectural style
- · faceted back features a slimming two-panel design creating a waistline while giving the chair an open feel
- high strength, 10-gauge steel recliner frame with welded arm support for rigidity and longevity
- soft edges and corners with thick, dense foam prevents damage to walls and upholstery
- 25-year warranty
- recline mechanism, transfer arm, intelliTrac casters and safeBrake-10-year warranty

## variety of models

### standard features
