## **Simple by design. Flexible by nature.**

Designed to adapt to the evolving needs of healthcare, Amari combines comfort, durability, and long-term value in a versatile recliner designed for a variety of care experiences.

# Simplicity Redefined

Simplicity isn't about doing less. It's about doing the right things well. Every feature on Amari is intentionally designed to support patients, simplify maintenance, and make caregiving easier.

## personalized comfort

Independent back and ottoman motion allow patients to recline comfortably without raising their legs, creating a position that's right for them.

## safer transfers

Optional fold-down transfer arms provide unobstructed access to support safer seated and sheet transfers.

## simplified cleaning

The optional quick-release seat simplifies cleaning, while durable hard surface components withstand harsh healthcare cleaners.

## confident control

An intuitive, color-coded caster system transitions seamlessly between braking, tracking, and zero-turn mobility.

## equipment compatible

Casters allow 5" ground clearance helping Amari integrate seamlessly with patient lifts and mobility devices.\*

*\*does not apply when footrest option is specified. 3" ground clearance with lift option.*

*Wide model shown.*

# Bringing care closer.

Care doesn't happen from just one position. It happens at the bedside, during assessments, throughout treatment, and in the everyday moments that help patients heal.

Amari Exam Lift better positions patients for a wide range of clinical interactions—including safer patient transfers—while improving caregiver ergonomics and maintaining patient comfort.

## Patient Comfort

Provides a comfortable resting position between care interactions.

## Transfer Ready

Raises to align more closely with bed height, supporting safer transfers and easier patient movement.

## Caregiver Ergonomics

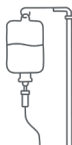

Supports better ergonomics during routine care, from assessments and IV placement to wound care.

*One recliner. More ways to care.*

## Thoughtfully equipped.

The remote stores neatly on the push bar, keeping controls within easy reach. A built-in battery level indicator lets caregivers quickly check available power, while the integrated battery helps ensure uninterrupted operation.

Twin wheel casters support the added demands of the lift mechanism while maintaining dependable mobility.

Thoughtful cord management keeps wiring organized, protected, and out of the way.

## amari collection highlights

### Comfort & Care

- Independent back and ottoman motion allows patients to recline comfortably without raising their legs.
- Compact footprint helps preserve valuable floor space for caregivers and clinical equipment.
- Large casters provide 5" of clearance for patient lifts and mobility devices\*, helping Amari work alongside essential care equipment.

*\*Does not apply when footrest option is specified. Ground clearance is 3" when exam lift option is specified.*

### Designed to Last

- Renewable components are designed to be replaced on site, extending product life.
- A standard moisture barrier provides an added layer of protection against everyday spills and routine cleaning.
- Backed by a 25-year warranty, including 10 years on the mechanism, 5 years on electrical, and 3 years on casters.

### Exam Lift

- Adjusts seat height from 22" to 34" to support assessments, safer patient transfers, and improved caregiver ergonomics.
- Integrated hand control, push bar, and battery backup support intuitive, dependable operation.
- Cord management helps keep wiring organized and out of the way.
- Supports patients up to 500 lbs., with a lift mechanism engineered with additional capacity for dependable operation.
