

hale

WIELAND
healthcare

where durability meets design that *belongs*

Hale is designed for healthcare spaces where durability and design are equally important. Its welded, heavy-gauge steel frame and durable powder-coat finish support long-term use in demanding environments, while clean lines help it feel at home in modern healing spaces. Molded foam cushions and a 550-pound weight capacity ensure Hale provides dependable support—without losing the warmth designers expect.

full cap arm cap option

easy access chairs fit seamlessly

A higher seat supports patients recovering from knee or hip surgery by reducing the need for deep bending during sit-to-stand movements. This helps protect sensitive joints while making standing and sitting more manageable. For caregivers, the elevated seat height requires less physical effort and provides added confidence when assisting patients.

comfort through motion

Hale's smooth, controlled motion supports comfort in care environments. Designed to feel steady and reassuring, the gentle movement enhances the experience for patients, families, and visitors during moments of rest or waiting.
